

VAT Cost Eligibility in EENergy

To claim back VAT costs incurred as part of your EENergy project implementation, you must submit evidence that the VAT in question is non-deductible under national law, which means it falls into one of the following categories:

- Exempt activities without right of deduction
- Activities which fall outside the scope of VAT under national law
- Activities where VAT is not deductible but refunded by means of specific refund schemes or compensation funds not referred to in Directive 2006/112
- Note that if a company is a public body acting as a public authority, VAT paid by them is always ineligible.

Please contact the helpdesk within the 5 working days of receiving your confirmation email, if you intend to claim back the VAT cost incurred and provide us with evidence of the cost being under one of the above-mentioned categories.

Please note, not being a VAT-registered company **does not automatically entitle you to claim VAT costs as part of your EENergy project**. Rather, only costs falling into one of the above categories may be claimed back.
